

## What's Happening

**Agriculture Survey** - Nordic Economic Development Corporation is working on a new initiative involving the Agriculture Industry. We are seeking information that will assist with identifying the agricultural prospects in our region of the Northern Peninsula (Economic Zone 6 – Anchor Point north to St. Anthony and east to Englee).

Agriculture involves anyone who cultivates the ground, grows and harvest food, the rearing and management of live stock and farming – whether to sell or for personal use. There is very little information concerning agriculture, therefore we are conducting the following survey to help us recognize the potential in our area. Please go to

<http://www.surveymonkey.com/s/MF2GCQ6> and complete the survey, by November 20, 2011. Or you can call Gail King Hynes, Agriculture Coordinator 709-456-2840.
